

United States of America

D'Alessio Inspired Architectural Designs is an international legacy builder/ developer, renowned for award-winning, exquisite haute couture, bespoke architectural interior millwork and exterior masonry details that create one-of-a-kind luxury mansion estates and châteaux.

This property with stunning views of the Delaware River and Canal forms a perfect example. The client has three young children and wanted a European styled, comfortable yet elegant, sophisticated home for modern living. Therefore, the French inspired, intimate family residence features an open plan first floor with a great room as the central focus. French doors open on to a terrace with river views and two and a half story, floor to ceiling windows

provide a light and airy ambience to the living areas. A sweeping staircase leads to en suite bedrooms while a Juliet balcony 'hovers' over the grandeur of this spectacular room.

D'Alessio's award-winning landscape design involves the seamless extension of indoor living spaces integrating them into an outdoor, relaxing, five-star resort styled backyard oasis. Designed for a three-generational family to have fun and entertain, the project makes use of a 10,000 square feet, unusable wooded area. A pool/spa was designed as the focal point and is surrounded by elegant terraces and patios. The impressive landscape design creates new access points from indoor rooms as well as a garden 'moon gate' entrance from the motor court.
